Earned Value Management Central Repository

21.5 January Release Items

1/10/2022

1 Summary

Below are the included items in the January Release of the API, Auth, CR, External API, NG, and Portal applications.

- Updates to the Data Views & Charts pages.
- Numerous bug fixes in the CR, Portal, and NG applications.
- New User Activity script report.

2 Site Changes

The primary changes in this release were updates to the Data Views & Charts page, including the addition of a new Submission Source modal and a new Data Quality modal. The rest of the changes included a new User Activity report and several bug fixes in the CR, Portal, and NG applications.

API

Added new call to check if a reporting period already has data quality issues associated with it.

Auth

Added new tracking of user login.

CR

Search Submissions optimization to decrease search time.

Removed User Profile information on Invalid Submitter modal.

Fixed duplicate contract and effort events being added on refresh of Manage Efforts page.

Removed unnecessary horizontal scrollbars from Contract Detail and Submission Detail.

Fixed incorrect NDA label on Contract Detail's Reviewers & Submitters tab.

Updated Requirements text on Submission Detail to use frequency of requirement when determining what is missing.

Updated Analyst Home to maintain filtering on the Search Programs tab after user leaves page.

Updated Report Data Quality Issue form in the CR to capture the Requester's name and email.

Fixed Compliance Report allowing users to generate blank exports.

Fixed bug with Previous and Next buttons on Upload Home and Reviewer Home occasionally moving forward or back 2 months on 1 click.

Fixed dropdowns on Analyst Home occasionally showing two "All" options.

Fixed white text on Submission Data Validation Report sub-headers.

Fixed several dropdowns in CR that were showing inactive options.

Fixed Formats Delivered showing a blank option in Service dropdown.

Fixed a bug with Upload Submission on the warning modal.

NG

Fixed bug with dropdown lists on the Help Desk reports.
Modified back button in Data Views & Charts to ignore changes made by the effort dropdown.
Fixed sizing issues with the Help Desk on smaller screens.
Removed unnecessary scrollbars from multiple NG pages.
Added ability to view submission source and submit data quality issues on Variance Chart.
Added ability to view submission source and submit data quality issues on TCPI-CPI Chart.
Added ability to view submission source and submit data quality issues on Element Performance Chart.
Added ability to view submission source and submit data quality issues on Budget Shifting Chart.
Added ability to view submission source and submit data quality issues on WBS Elements table.
Added ability to view submission source and submit data quality issues on OBS Elements table.
Added ability to view submission source and submit data quality issues on Summary Elements table.
Added on-click ability to view submission source from data points on the POT, Variance, and TCPI-CPI charts.
Added TCPI-CPI calculation modal.
Fixed issue with charts showing missing periods when they shouldn't.

Portal

Fixed bug with add employee/associate functionality on NDA Administration
Fixed multiple minor bugs with the resizing and moving of the dashboard tiles.
Fixed the close button on the News Item Detail modal.
Updated instructions in the Dashboard Help tile.
Fixed Effort modal on User Manager's Associations tab.
Added a new User Activity script report.
Made Database Configuration page read-only for all users except Super Admins.
Fixed some minor bugs with the News Manager.

3 DB Changes

There were changes made to the DCARCPortal, DCARCReporting, EVM, and EVMData Databases.

- The changes made were all stored procedure and function call updates. There should be no schema changes in this release.
